# Archiving COVID-19 Memory Websites: "COVID-19 Images and Stories" and Other Sites

COVID-19 Images and Stories

Stories: 464 (since June 2020)
Users: 1498 (180 active)

Archiving Community Memory Websites

- Web archiving at the Internet Archive is essential
- Need to go beyond web (page) archiving, so as for
  - preserving the context of the community (e.g. contacts of the contributors)
  - preserving the original media files and all the related metadata too
  - long-term data stewardship; trustworthy data repositories; FAIR data principles
- Collaboration between the archivists and the website operators
- Interoperable plug-ins for website data export and import
- (Semi-)automatic and streamlined data workflow for archiving community memory websites
